

Management Plan Addendum for the 2010-2015 AFF Standards

Where present and relevant to the property, your management plan must address the following resource elements:
Please include only those items not already addressed adequately in your current management plan.

1. Review your management plan to determine if it states a desired forest condition, management activities aimed at reaching that condition, and a general schedule of activity implementation.

2. Forest Health: *The previous standards addressed environmental quality generally. The 2010 standards now separate out forest health, soil, and water.*

What is the condition of your forest? Are you conducting any activities to improve the health of your forest?

3. Soil: *The previous standards addressed environmental quality generally. The 2010 standards now separate forest health, soil, and water.*

Do you have any general information on your forest soils? To conduct some preliminary research on your soils, visit the National Resource Conservation Service's (NRCS's) website: <http://websoilsurvey.nrcs.usda.gov/> or contact your local office of the USDA-Natural Resource Conservation Service.

4. Water: *The previous standards addressed environmental quality generally. The 2010 standards now separate out forest health, soil, and water. For more information on your state's Forestry BMPs, visit www.treefarmssystem.org/woodlandresources.*

Do you have any water on your property (e.g., streams, ponds, vernal pools, etc.)? If relevant, indicate water resources on your tract map. Are you planning any activities (new or continued) to protect these water resources?

All Tree Farmers must adhere to current State Forestry Best Management Practices (BMPs) even in those states where BMPs are voluntary. I commit to implementing applicable BMPs on my Tree Farm.

Yes No

COMMENTS:

5. Threatened or Endangered Species: Are you aware of any occurrences of any threatened or endangered species (listed by your state or the federal government) on your property?

Yes No

COMMENTS:

What sources of information have you consulted to determine occurrences of threatened or endangered species on your property? The following are examples of research you may have conducted (please check those you have completed):

Walked the property with a knowledgeable natural resources professional

DATE:

COMMENTS:

Consulted the state natural resource agency

DATE:

COMMENTS:

Researched sites provided on the ATFS Woodland Owners' Resource (www.treefarmssystem.org/woodlandresources)

COMMENTS:

Please include management activities related to the protection of any special sites found on the property:

Management Plan Addendum for the 2010-2015 AFF Standards

6. Special Sites: *Although this is not a new requirement under the AFF Standards, it has been included in the addendum as a result of ATFS inspections and third-party certification assessments have shown this management plan component that could be improved.*

Do you have any special sites on your property? (e.g., historical burial ruins, old cemeteries, cave entrances, rare mineral outcroppings, unique ecological communities).

Special sites can be identified by the landowner or by outside credible organizations such as a state forestry agency.

Yes No

COMMENTS:

How have you made an effort to locate any special sites on your property? The following are examples of efforts you may have made to locate special sites (*Please check those you have completed*):

Yes No

Please include management activities related to the protection of any special sites found on the property:

7. Integrated Pest Management and Invasive Species: What have you done to monitor your forest for the possible presence of any pests and/or invasive species?

Do you have any pest problems or invasive species on your property? If yes, please list.

Yes No

All Tree Farmers must consider integrated pest management to control pests, pathogens, and unwanted vegetation (including invasive species). I commit to considering a variety of available pest management options when dealing with pest problems on my property. (*Remember, integrated pest management techniques may include mechanical devices, physical devices, genetic, biological, or chemical management techniques*)

Yes No

COMMENTS (*may include examples of management activities you will conduct to deal with any pests*):

8. High Conservation Value Forests: Are you aware of any forests of exceptional conservation value on your property? (*Definition: forests of outstanding and critical importance due to their environmental, social, biodiversity, or landscape values*)
